

Joint Hurricane Testbed Administrative Update

Brian Zachry – NOAA/NWS/NCEP/National Hurricane Center Jason Sippel – NOAA/OAR/AOML Hurricane Research Division

The JHT is funded by the US Weather Research Program in NOAA/OAR's Weather Program Office

75th Interdepartmental Hurricane Conference

Joint Hurricane Testbed (JHT)

- Bridges gap between hurricane research & operations
- Began in 2001 under the USWRP
 - Currently in year 2 of the 10th round of projects
- Our Mission: successfully <u>transfer</u> new technology, research results & observational advances from research groups to operational centers
- Testing is done at the National Hurricane Center, Central Pacific Hurricane Center or at their institutions

JHT Staff and Funding

- Brian Zachry: JHT Director, NHC Science and Operations Officer,
 Acting Technology & Science Branch Chief
- Jason Sippel: JHT Assistant Director and HRD Meteorologist
- Alan Brammer: JHT R2O Facilitator/Programmer
- Current funding for FY19-22:
 - Roughly 600K for current projects
 - ½ time support for JHT Facilitator/Programmer
 - 0.2 FTE support and HRD for admin support
 - ~15K for JTTI project support (real-time demonstration and evaluation)
- FY23 funding round is just around the corner

JHT Project Overview

- Round 8 (FY15-17): 8 projects completed
 - 5 accepted for operational implementation
 - 1 deferred until additional evaluation can be conducted
 - 2 not accepted for operational implementation
- Round 9 (FY17-19): 6 projects in total (awaiting decision letters)
 - 5 projects completed
 - 1 project in no-cost extension
- Round 10 (FY19-22): 3 new projects in progress
 - 2 projects FY19-21
 - 1 project FY19-22

NHC Procedure for Operational Decision

- JHT staff receive final project reports from PI(s)
- Distribute interim and final project reports to NHC forecaster points of contact (POCs), TSB Chief, HSU Chief, and JHT Staff for comments and feedback
- Collect feedback from project POCs from real-time demonstrations
- Author NHC Operational Implementation Reports for each project
- Brief NHC Director on each project and JHT staff recommendation
- NHC Director makes final decision and signs recommendation report
- Send final decision reports and formal letter to PI(s)
- NHC/TSB adds JHT transitions to O&M and annual development priorities

Metrics for Operational Implementation

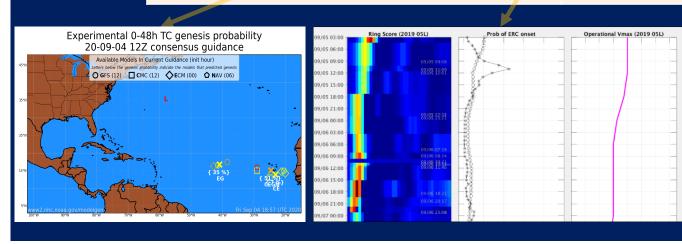

- Forecast or Analysis Benefit: expected improvement to operational forecast and/or analysis accuracy
- Efficiency: adherence to forecaster time constraints and ease of user's needs in forecast process
- Compatibility: IT compatibility with operational hardware, software, data, communication, etc.
- Sustainability: availability of resources to operate, upgrade, and/or provide support

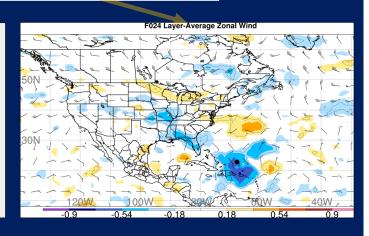

JHT Operational Implementation Summary

- 98 projects supported in 10 funding rounds
 - 59 accepted for operational implementation
 - 24 not accepted
 - 6 deferred
 - 4 projects ongoing (3 current round and 1 NCE)
- Currently writing NHC Operational Implementation Reports for FY17 and previously deferred projects

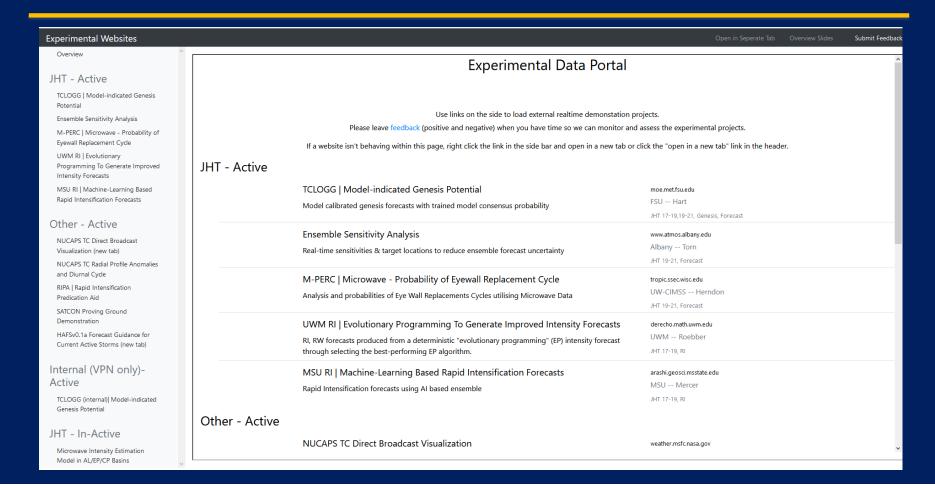

FY19-22 JHT Projects

Project Title (FY19-22) Further improvements and extensions to the tropical cyclone logistical guidance for genesis (TCLOGG) FY19-22 Upgrades to the M-PERC and PERC Models to Improve Short Term Tropical Cyclone Intensity Forecasts FY19-21 Transitioning Ensemble-based TC Track and Intensity Sensitivity to Operations FY19-21 Principal Investigator(s) Robert Hart (FSU) Dan Halperin (Embry-Riddle) Derrick Herndon (UW Madison) Ryan Torn (Albany)

NHC Internal Webpage

Current JTTI Projects

- FY18: 1 Project in JHT Evaluation
 - <u>Dan Halperin</u>: Adding tropical cyclone genesis verification capabilities to the Model Evaluation Tools Tropical Cyclone (MET-TC) software
- FY19: 2 Projects in JHT Evaluation
 - <u>Nate Hardin & Taylor Trogdon</u>: Generating Storm Surge Hazards using Hazard Services
 - <u>Galina Chirokova</u>: Use of Ocean Stability Data and Machine Learning to Improve Tropical Cyclone Situational Awareness and NHC Statistical-Dynamical Intensity Guidance

Tropical and Marine Transition Lab (TMTL)

- Kickoff at the HRD-NHC Science Meeting (2/11) with Ken Graham and John Cortinas
- Support from OAR for construction, remodeling, IT equipment, furniture, etc.
- TMTL potential projects:
 - Various testbed and/or projects related to tropical (JHT, JTTI, HFIP, Satellite, SBES, observations, marine, etc.)
 - Short-fused operational issues or media graphics
 - Parallel AWIPS system for testing and data ingest
 - Tropical product testing with partners
 - Dream it up!
- Working to partner with GSL to establish AWIPS Cloud environments to enable an efficient R2O pathway
- Potential participants involved in lab include staff from various testbeds, AOML/HRD staff and scientists, social scientists, emergency managers, visiting scientists, core partners, private sector, university scientists, etc.

Prototype TMTL Layout
